

Lessons learned from one of New Zealand's most challenging civil engineering projects: rebuilding the earthquake damaged pipes, roads, bridges and retaining walls in the city of Christchurch 2011 - 2016.

SCIRT Health and Safety Policy – February 2016

Story: Health and Safety

Theme: Programme Management

The revised SCIRT Health and Safety Policy.

This document has been provided as an example of a tool that might be useful for other organisations undertaking complex disaster recovery or infrastructure rebuild programmes.

Health and Safety is SCIRT's highest priority - we are committed to ZERO HARM in the workplace.

We will achieve this by:

- ❖ Placing the health and safety of our people, contractors and the community above all else
- ❖ Empowering our people to stop unsafe processes and to speak up about any areas of health and safety concern
- ❖ Ensuring our people are trained in safe methods of work
- ❖ Leading health and safety by example
- ❖ Complying with relevant health and safety legislation, regulations, codes of practice and standard operating procedures
- ❖ Working collectively to raise industry health and safety performance standards
- ❖ Accurately report, record, investigate and learn from all workplace incidents and injuries
- ❖ Identifying key health and safety risks and ensuring appropriate controls and practices are developed and implemented

We believe every job can be done safely and without harm.

Adopted by the SCIRT Board on 10th February 2016

The image shows several handwritten signatures in blue ink, representing the SCIRT Board members who adopted the policy. The signatures are written in a cursive, flowing style.
